

Declaration of RoHS/WEEE Conformity

The European Parliament and the Council of the European Union have adapted directive 2011/65/EU ("RoHS 2") and later 2015/863/EU ("RoHS 3") on the restriction of the use of certain hazardous substances in electrical and electronic equipment. This applies together with directive 2012/19/EU on Waste Electrical and Electronic Equipment ("WEEE").

In compliance with its Company Policy, Trafag is committed to the economical use of energy and materials and to the avoidance of the use of materials or processes harmful to the environment. Adhering to directives 2011/65/EU ("RoHS 2"), 2015/863/EU ("RoHS 3") and 2012/19/EU ("WEEE") within the time frame stipulated by the EU is an obligation for Trafag which the company will fulfil in close cooperation with its suppliers whenever technical expertise allows its implementation even if exceptions of the directive were permitted.

RoHS Conformity

Trafag herewith declares that the products supplied with this declaration of conformity meet the EU Directives 2011/65/EU ("RoHS 2"), 2015/863/EU ("RoHS 3"), 2012/19/EU ("WEEE"), 2018/740/EU and 2018/741/EU.

WEEE Compliance

Trafag pressure transmitters, density monitors and pressure and temperature switches (both mechanical and electronic) do not fall under the terms of EU WEEE Directive 2012/19/EU covering waste electrical and electronic equipment.

The plant and systems into which these Trafag products are fitted generally consist of large, fixed industrial installations or mobile heavy machinery not intended for use in everyday road traffic. Our equipment is solely for professional industrial use and is supplied on this basis. Some plants and systems in this context also fall under other categories in Art. 2 §4 which are exempt from the WEEE directive.

Since Trafag products are intended for use as integral, critical subunits of large-scale industrial plant and equipment which themselves are exempt from the provisions of Art. 2 §3b of the directive, our products are also consequently exempt.

If you intend to install Trafag products in equipment or systems which are not exempt from the provisions of the WEEE directive, then please contact the following.
