Description of the types of data collected by the app (access rights)

Explanation of the purpose for which this data is collected.

As part of your use of the **Sensor Master Communicator App**, we automatically collect certain data that is required for the use of the App.

This includes the following data:

■ Location data / Bluetooth devices

We require access to the location of your device. When searching for SMI communication hardware, we collect the Bluetooth devices in the area. Location-related data such as Bluetooth and IP addresses are only used to process your search request and are not automatically transmitted.

■ WLAN connection information

We require access to the WLAN connection information. When searching for SMI communication hardware, IP addresses of the network environment and the state of the WLAN connection. The location related data like Bluetooth and IP addresses are only used to process your search request and are not transmitted automatically.

■ Memory / Files

We need access to the memory and files of your device. For the identification and configuration of our products, the related parameters are collected and stored. This product-related data is only used for processing and may be stored or transmitted in file form upon explicit request.

Information about transmission to third parties and its purpose

There is no automatic transmission of data to third parties.
